Floor footprint	686 × 620 mm
Mobility	Integrated castors
Heater	Optional additions

Compatibility

Design Classic 2400 W; other combinations from the same generation depending on the kit

HEATSTRIP · THHAC-019

Preparing and using this accessory

Plan the location

Allow 686 × 620 mm for the base on flat, stable ground, keeping passageways clear. Route the cable so it is neither under tension nor caught in the castors.

Assemble the unit

Assemble the base, column and top of the stand using the parts and fasteners from the European kit. Mount the compatible heater on the top, centre it and adjust its direction before checking the fastenings.

Heaters shown for this stand

Design Classic 2400 W; the European catalogue also shows same-generation combinations with Design Classic 1500 W and Elegance 1800 / 2400 W.

Move the heater

Switch off the heater, unplug it and allow it to cool completely before moving the stand. Place the base on stable ground and check the cable route before switching on again.

Maintain the stand

Clean the surfaces with a soft cloth and mild detergent. Check the castors, fastenings and connecting pieces.
