Compatibility

Design Classic - THH series

HEATSTRIP · ZBRAK-113S

Preparing and using this accessory

Position the mounting bracket

This pair of brackets is intended for the THH Design Classic series. Place the brackets at the heater's mounting points, then fit the heater's connecting pieces.

Direct the radiant heat

Keep the panel directed towards the places to be heated. Adjust its direction using the parts intended for this mounting arrangement, then lock the connections.

Check the mounting

Check the structural anchors, fastenings and clearances specified in the heater manual. Keep the cable away from hot surfaces and passageways.

Maintenance

Before making any adjustment, disconnect the heater's power supply and allow it to cool. Clean the brackets with a soft cloth and check the mechanical connections at regular intervals.
